Quarterly Probe Monitoring Results

Dear Ms. Lammers:

Enclosed please find the results of the quarterly gas monitoring performed on behalf of the Village of St. Bernard at the closed St. Bernard Landfill on June 12, 2018.

No combustible gas concentrations at or above the compliance threshold were detected at any of the probes in the compliance monitoring network. The monitoring results are attached. One probe, MP-7E is watered in. The water level in the probe will be checked during the next monthly operations check. If the water level is still above the top of the screened interval, an effort will be made to remove water from the probe before the next quarterly monitoring event.

It is anticipated that the next quarterly monitoring event will be performed during the first full week in September 2018.

Should you have any questions or comments, please contact the undersigned.

Sincerely,

Randall C. Mills, P.G.
