Subject: St. Bernard Landfill, Blower Shutdown Test Monitoring Report

Dear Ms. Lammers:

This letter presents the results of the monitoring for the blower shutdown test performed on October 16, 2020. The following activity was performed:

- Friday, October 16, 2020 – a round of monitoring was performed at MP-9, one of the compliance probes which had experienced exceedances.

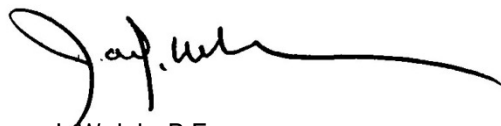

The monitoring form is attached. The combustible gas concentration was below 5 percent at MP-9. With the Friday, October 16th monitoring, a minimum of four rounds of monitoring results below 5 percent with the latest result more than 14 days from the initial result (September 30 and October 6, 9, 12, and 16) has been obtained for MP-9. Therefore, the blower shutdown test monitoring at MP-9 will return to a monthly schedule. It is anticipated that the next monthly round of monitoring, this time on all probes, will occur during the first or second week in November.

Please contact the undersigned if you have any questions.

Sincerely,

Randall C. Mills, P.G.
Senior Project Scientist
SCS Engineers

James J. Walsh, P.E.
