

February 27, 2026 Update –

Cincinnati, OH – Synthica St. Bernard is issuing this statement to correct information presented at the Village of St. Bernard Council public meeting on February 26, 2026.

At the meeting, it was indicated that the Synthica St. Bernard facility had completed repairs to the anaerobic digester and resumed operations. To clarify, the facility remains in the decommissioning phase. Synthica St. Bernard is taking this step to allow for a thorough inspection to identify odor mitigation measures before the facility resumes commissioning to become fully operational. It is anticipated that the process to empty and clean the tanks will conclude over the next couple of weeks.

Synthica St. Bernard is committed to continuing to provide information to the Village of St. Bernard officials and the public to gain the confidence of the community, so that we can provide clean energy to the local utility.
